4 = Door

4 = Door

16 = Sick Queen

Story

A queen was invited to a queenly ball at a fancy hotel in a big city. When she arrived at the hotel, she was amazed to see doors that go around in a circle. The queen had never seen revolving doors. She pushed on the door. "Whoopee!" she yelled as she went around and around. When the dizzy queen finally stepped out from between one DOOR (4) and the other DOOR (4), she was a very SICK QUEEN (16).
