

## Activity for $2 \times 7 = 14$ Multiplication.com

### Kings Surfin' Diorama

Materials Needed:

Clear Plastic Cups

Tape

Paper Clips

Construction Paper

Printouts below

Scissors

Directions:

Cut out the pictures of the Shoe, the wave (cut off the surfer) and the Kings. Using tape, attach the shoe to the wave like a surf board. Then attach the 4 kings to the surf board. Cut a piece of construction paper in a circle large enough to cover the opening of the cup. Open two paperclips to a 90 degree angle. Tape paperclips tops to the surf board and the bottom to the round construction paper. Use tape to fasten the round cut out to the bottom of the cup. Flip over to see the diorama.

While creating the diorama, have students repeat Shoe (2) x Surfin' (7) = Four Kings (14). Display dioramas in the classroom to help students remember  $2 \times 7 = 14$ .
