**Tree x Sign =
Denty Chef Van**

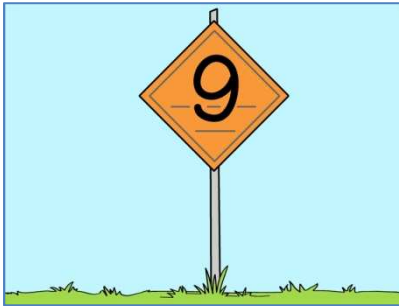

$$3 \text{ (Tree)} \times 9 \text{ (Sign)} = 27 \text{ (Denty Chef Van)}$$

Pictures

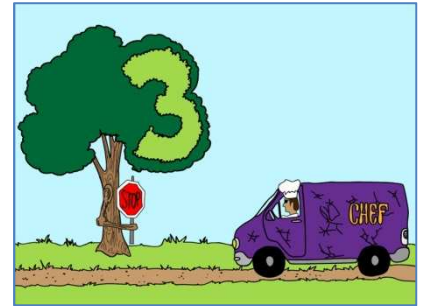

3 = Tree

9 = Sign

27 = Denty Chef Van

Story

A tree decided to have a party for her forest friends. She wanted to serve great food, so she called a chef who did his cooking in a special chef van. The tree told the chef she would be waving a sign so she would be easy to see in the forest. As the chef drove through the forest, branches kept hitting and denting his van. By the time the chef found the TREE (3) waving the SIGN (9), he was driving a DENTY CHEF VAN (27).
