Fred the leprechaun is making dinner for his friends. It’s St. Patrick’s Day and he really wants to make his mom’s homemade Corn Beef and Cabbage with lots of veggies on the side. His party starts at 6:00. He has all the right ingredients, but he has a problem: he invited 12 friends for dinner but his Mother’s recipe is only enough for 4 people. What should Fred do?

Here is Fred’s Recipe, can you help him figure out how much to make?
